LIVING ROOM

Natural comfort with the lightweight and soft structure of the **goose feather** filling used in throw pillows.

Comfortable seating experience thanks to **pocket spring** technology consisting of independent tiered springs.

The next generation **HR foam** which has a high elasticity support will not deform the sofa after seating and it lasts for long years.

Elastic band at the bottom of the seating mat prevents deformation over time and provides high comfort. It helps keep your sofa new for years.

### STYLE CODES OF HIGH COMFORT

**MAISON LIVING ROOM**, which focuses on feeling good and belonging in living spaces and aims at high comfort in contemporary decoration setups, brings the feeling of comfort and renewal to the center of interior decoration without compromising aesthetic needs.

Maximizing comfort with material combinations accompanying the contemporary design line, **MAISON LIVING ROOM** combines aesthetics and functionality.

**MAISON LIVING ROOM** offers a unique comfort area with a seating area designed with multi-layer foam and pocket spring technology in different densities. Combinations of quality materials exalted in details, metal legs on armchairs and sofa give life to an aesthetically rich and long-lasting decoration style.

High comfort foam used in back cushions brings the ergonomics of **MAISON LIVING ROOM** to a premium level. While the four-legged and swivel metal base alternatives in the armchair module provides ease of use, goose feather filled pillows complete the design.
